DOLOMITE

CALCIUM & MAGNESIUM NATURAL S

Want a natural supply of calcium and magnesium? Dolomite comes from sedimentary rocks composed of algae, corals, molluscs and crustaceans. This natural mineral is bioavailable and balanced in calcium and magnesium (2/3 calcium, 1/3 magnesium). Dolomite is recommended for people wishing to consume calcium and magnesium of natural origin.

HEALTH CLAIMS

- ✓ Dolomite is a remineralising agent that contains calcium and magnesium, helping to maintain normal bones and teeth;
- ✓ The calcium and magnesium contained in dolomite contribute to normal muscle function;
- ✓ The magnesium contained in dolomite contributes to the proper functioning of the nervous system.

ADVANTAGES OF THE FORMULA

- ✓ Natural mineral made from sedimentary rock;
- ✓ Calcium (2/3) and magnesium (1/3) intake;
- ✓ Natural galenic form (pullulan) and excipient (rice starch).

PRECAUTIONS FOR USE

Monitor vitamin D level in case of long-term treatment. Avoid exceeding 3 months of treatment and avoid combining with other calcium or magnesium supplements. Not recommended in case of renal insufficiency and people allergic to molluscs and crustaceans.

RECOMMENDATIONS

This dietary supplement does not replace a varied and balanced diet and a healthy lifestyle and is not a drug. Inform your doctor and/or pharmacist if you are taking medication at the same time. Keep out of the reach of children. Store at room temperature and in a dry place. Do not exceed the recommended daily dose.
